

The world's leading Organisation Empowerment System
STREAMLINE AND CREATE SAVINGS
FOR YOUR BUSINESS WITH SYCLE

SYCLE is CAMMS' premier product developed for organisations who see the big picture and understand the importance of taking an holistic approach to the performance of their business. SYCLE is a cloud-based Organisational Empowerment System that enables public and private sector organisations to create value to their bottom line whilst aligning their business to meet corporate strategy.

WHAT MAKES SYCLE UNIQUE? THE EMPOWERMENT CYCLE

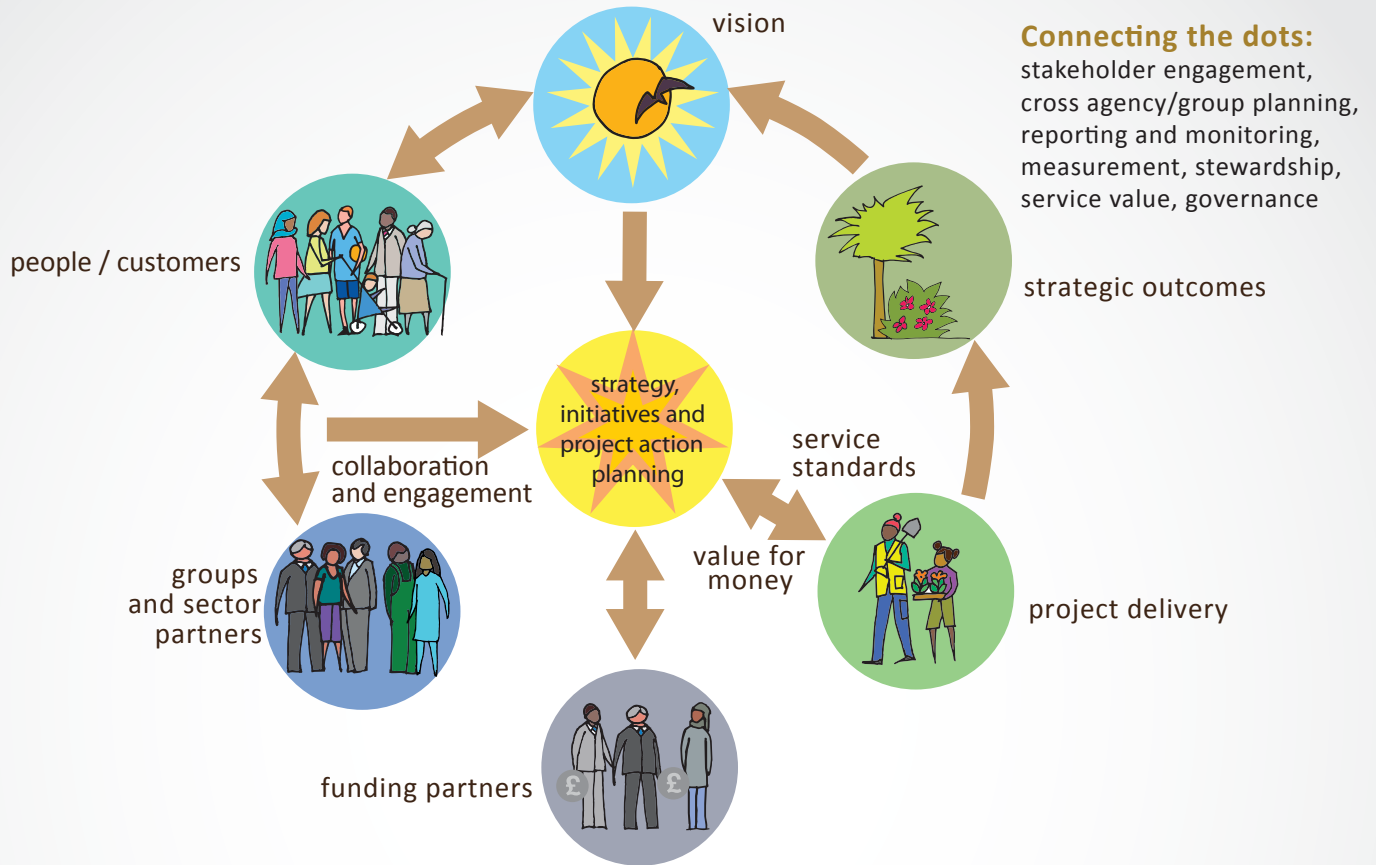

The complete cycle: provides essential links between service delivery and strategic outcomes, and every aspect of operation, control, assessment, monitoring and engagement in between.

The Empowerment SYCLE enables organisations to establish essential links between services, strategic direction and all aspects of operations, control, assessment, monitoring and engagement.

CONNECT THE BIG PICTURE DOTS WITH SYCLE

Unlike many systems which focus primarily on measuring performance, SYCLE empowers an organisation by incorporating the key management functions of strategy development, project/programme planning, resource allocation, financial and budget management, risk management and monitoring in a coherent and integrated fashion.

SYCLE breaks down all the traditional silos and empowers those with the responsibility to deliver. Flexible configurations tailored to meet your business needs ensures risks are minimised and outputs are delivered efficiently and effectively, thereby allowing strategic decisions to be made based on current and timely business intelligence. The result is bottom line savings.

SYCLE's full integration between functions and systems ensures high standards of openness and transparency for management and stakeholders without the burden of stringent controls that reduce productivity and competitiveness.

SYCLE is more than a software product - it is a proven management concept that provides results. CAMMS' unique training and implementation approach builds internal capacity to understand the why and not just the how. A combination of e-training, virtual and on-site consulting, and interactive consulting products can help facilitate your change management requirements at the same time.

The SYCLE integrated solution incorporates:

Planning and Management

The delivery mechanism in achieving your vision through a single platform to plan, monitor and report on all organisation-wide activities and performance, using sophisticated, graphical reports that provide high level executive snapshot views.

Executive Intelligence

Executive Intelligence information that consolidates organisation-wide performance data into a meaningful context to facilitate management decision making. Flexible views of organisational and planning performance, with “drill up/down” and “slice-and-dice” analysis insight and exception reporting capabilities are provided.

Service Planning

A review mechanism that supports process analysis, organisational improvement and change initiatives to ensure the ongoing sustainability, efficiency and effectiveness in the delivery of your services and programs.

Learning Management Centre

Build capacity, share knowledge and facilitate greater information distribution across your organisation through the utilisation of an integrated portal of training programs and information.

Power Data

Power Data leverages the Microsoft BI Platform to provide critical linkage between CAMMS' unique empowerment system and your organisation's data, wherever it may be. It provides a web accessible data portal incorporating data analytics and exploration, ad-hoc report creation and export facilities.

Business Planning

Develop and deliver your business plans through a series of interactive workshop exercises that incorporates training opportunities and templates, along with extensive “how to” instructions.

Project Management

Provides the sophistication, consistency and flexibility to manage from commencement to post implementation review, with a focus on rigorous project assessment, selection and prioritisation, that enables a greater strategic focus on managing your entire project portfolio.

Risk Management

Identify, profile, assess and evaluate risks at strategic, operational and project levels and incorporate risk treatment plans and mitigating solutions with your planning and reporting framework to ensure your organisation's risk profile is monitored and maintained at a suitable level.

Specialist Planning

A central repository for the development, implementation and review of all specialist planning documents that promotes accountability in the successful delivery and implementation of planning deliverables.

Workforce Planning

Anticipate your future organisational workforce requirements, human capital and cost required to respond to future service pressures and needs, through sophisticated scenario planning and modelling.

Financial and Budget Management

Develop, monitor and review Budgets, Financial Plans and forecasts using flexible workflow functionality and web based technology that incorporates your own financial and budget management approach.

Stakeholder Engagement

An outward facing, sophisticated online portal for engaging, consulting and jointly working with key stakeholders, partners and communities.

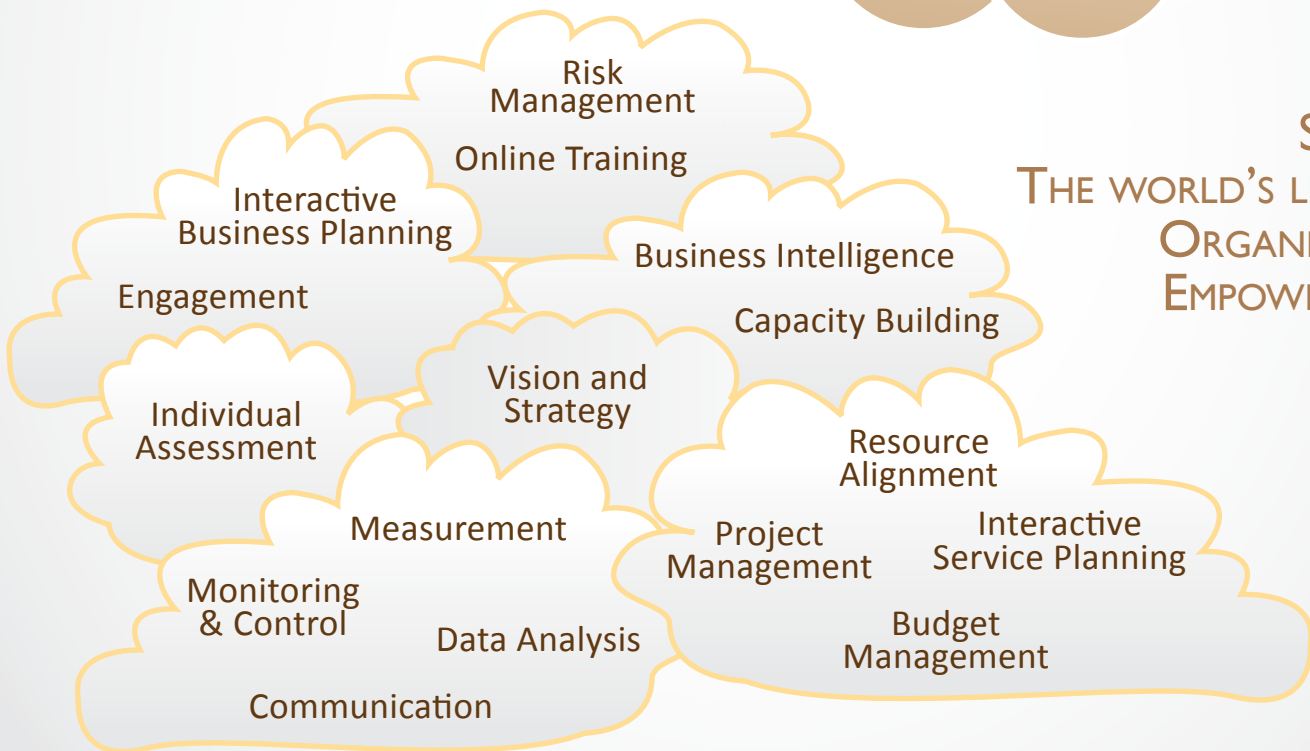

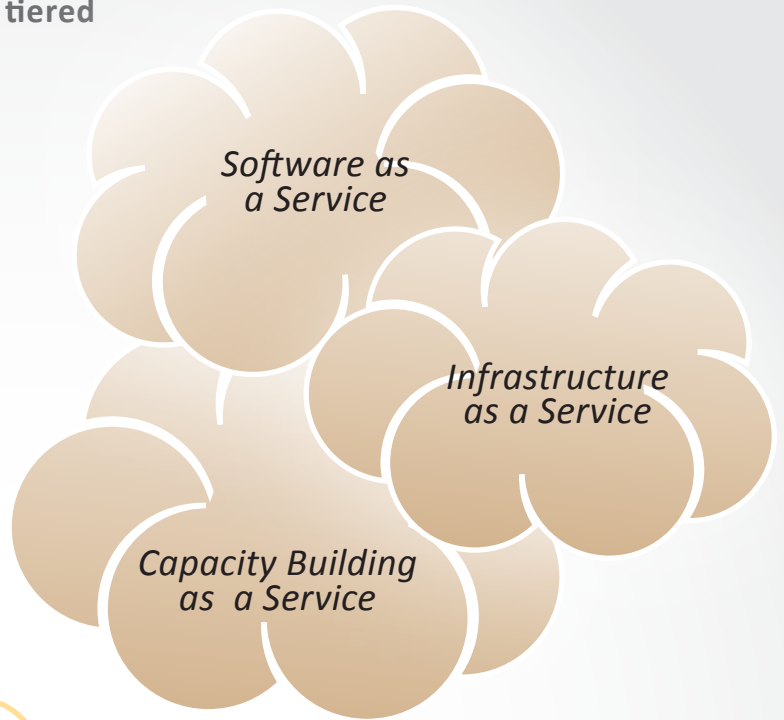

SYCLE AS A CLOUD SOLUTION

CAMMS approach to cloud solutions is three tiered

Infrastructure, software and on-line capacity building as a service enables you to achieve maximum impact, producing immediate value whilst minimising upfront costs.

CAMMS provides SYCLE as a public or private cloud solution so businesses can avoid capital expenditure by selecting our utilisation-based rates, subscriptions or renting options.

Whether you are a public sector agency, large multinational or a SME, SYCLE can be utilised to empower your business through realistic purchasing options.
